Page-by-page guides

Each guide follows: Purpose → When to use it → How to get there → Operate from the console (UX) → Related pages.

Every route is also listed in the [complete page index](#).

Cli

Page	What it covers
CLI: events	Tail normalized carrier / routable / routes / manager events.
CLI: list / show	Inspect interfaces, routes, and rules the daemon tracks.
CLI: status	Show daemon health via the REST API.
CLI: validate / reload / test	Safe config checks and controlled reloads.

Hooks

Page	What it covers
Hook: carrier / no-carrier	Run scripts when link layer goes UP (<code>carrier.d</code>) or DOWN (<code>no-carrier.d</code>).
Hook: manager / NetworkManager	<code>activated.d</code> , <code>disconnected.d</code> , and <code>manager.d</code> cover NetworkManager device and manager state.
Hook: routable	Fire when an interface has full L3 connectivity (systemd-networkd + dhclient paths).
Hook: routes	React to routing table changes (<code>routes.d</code>).

Ops

Page	What it covers
Configuration YAML	Tune backend, monitored interfaces, policy routing list, API/metrics, filters, audit.
Prometheus metrics (:9091)	Fleet scrape for hook/event health.
REST API (:9090)	Query status, interfaces, routes, rules, and events without SSH/ <code>ip</code> .

11 guides. Regenerate: `node scripts/customer-docs/generate-guide-index.mjs` .

CLI: events

Purpose

Tail normalized carrier / routable / routes / manager events.

```
netevd events
```

```
netevd events -f -i eth0 -t routable --tail 20
```

Related

[status](#) · [hooks](#)

CLI: list / show

Purpose

Inspect interfaces, routes, and rules the daemon tracks.

```
netevd list interface  
netevd list routes  
netevd list rules  
netevd show interface eth0
```

Related

[events](#) · [Workflows](#)

CLI: status

Purpose

Show daemon health via the REST API.

```
netevd status
```

```
netevd status -f json --endpoint http://127.0.0.1:9090
```

Related

[rest-api](#)

CLI: validate / reload / test

Purpose

Safe config checks and controlled reloads.

```
netevd validate -c /etc/netevd/netevd.yaml
netevd reload --endpoint http://127.0.0.1:9090
netevd test # see --help for dry-run style checks
netevd version --detailed
```

Global flags: `--dry-run` , `-v` , `-c /path/to/netevd.yaml` .

Hook: carrier / no-carrier

Purpose

Run scripts when link layer goes UP (`carrier.d`) or DOWN (`no-carrier.d`).

When to use it

Cable plug / Wi-Fi associate notifications. **Not** for “has an IP yet” — use `routable.d` for L3.

How to get there

```
sudo install -m755 myscript.sh /etc/netevd/carrier.d/10-log.sh
```

What you can do

- Log or notify on link flaps
- Combine with `$LINK` / `$BACKEND`

Related

Hook: manager / NetworkManager

Purpose

`activated.d` , `disconnected.d` , and `manager.d` cover NetworkManager device and manager state.

When to use it

Hosts where NM is the primary backend (`system.backend: NetworkManager`).

How to get there

Matching directories under `/etc/netevd/` .

Related

[Admin basics](#) · [config-yaml](#)

Hook: routable

Purpose

Fire when an interface has full L3 connectivity (systemd-networkd + dhclient paths).

When to use it

Start dependent services, register DNS, notify when `$ADDRESSES` is meaningful.

How to get there

`/etc/netevd/routable.d/` — executable scripts, lexical order.

What you can do

- Read `$ADDRESSES` , `$JSON` (networkd), `$DHCP_*` (dhclient)
- Branch on `$BACKEND`

Related

[carrier](#) · [Workflows](#)

Hook: routes

Purpose

React to routing table changes (`routes.d`).

When to use it

Policy updates, VPN route injection side effects, auditing default-route changes.

How to get there

`/etc/netevd/routes.d/`

Related

Configuration YAML

Purpose

Tune backend, monitored interfaces, policy routing list, API/metrics, filters, audit.

Path: `/etc/netevd/netevd.yaml` — start from `config/netevd.example.yaml` .

Highlights

- `system.backend` — systemd-networkd | NetworkManager | dhclient
- `routing.policy_rules` — interfaces getting custom tables
- `filters` — execute / ignore / log by interface pattern or event
- `api` / `metrics` — bind and ports

Prometheus metrics (:9091)

Purpose

Fleet scrape for hook/event health.

```
scrape_configs:  
  - job_name: netevd  
    static_configs:  
      - targets: ['edge-01:9091']
```

Related

[rest-api](#) · [Workflows](#)

REST API (:9090)

Purpose

Query status, interfaces, routes, rules, and events without SSH/ `ip` .

Default bind is **localhost** — open carefully for remote scrapers.
